Software Engineer with 5+ years of experience building scalable platforms including LMS, healthcare, and logistics systems. Skilled in Laravel, Next.js, and DevOps. Business-savvy with a background in administration and a diploma in software engineering. Known for timely delivery and technical precision.

Experience

Oncopadi Tech (May 2025 - present)

Website:(<https://brant.prosecare.com>)

Backend Developer(Laravel Developer)

Brant is a healthcare application focused on breast cancer, designed to assist women in cancer diagnosis. Through the app, women can receive IHC consultations and MDT consultations, with their reports delivered directly within the platform.I am responsible for maintaining, creating, and debugging the API, as well as managing the virtual server for deploying the backend code. I also ensure that both the frontend and backend function smoothly on the production server

OAK Telecoms and Technology Consulting Ltd (July 2025 - October 2025)

Backend Developer(Laravel Developer)

OAK Telecom and Technology Consulting Ltd. ("OT&T Consulting") is a technology consulting, process automation, and software development firm.The firm was contracted by NIMASA to develop an application that enables individuals, companies, and shipping agents to register their vessels, renew licenses, and obtain other essential certificates required for vessels to operate and trade within Nigeria and beyond.

Appentus innovative Web & App Solution (JAN 2025 - April 2025)

Website:([Good To Grab](#), [Login | RmHex](#))

Backend Developer(Laravel Developer)

G2G is a food delivery application where vendors can upload the food they sell. I was responsible for creating, debugging, optimizing, and migrating the database, as well as integrating third-party APIs. Rmhex is a CRM application for managing machines and other equipment. The application includes

authorization for different types of users, each with specific functionalities. It is available as both a web and mobile application.

Candiid Technology (Dec 2024 - Feb 2025)

Website:(atarrodo.com, [Skooleeo - School Management System and E-Learning platform](#))

Full Stack Developer(Next js /Vue and Laravel Developer)

Atarrodo is a learning management system (LMS) designed specifically for children.

I was responsible for converting the Figma UI designs into a fully functional Next.js frontend, ensuring the application is responsive across all devices. Additionally, I connected the frontend to the backend API to enable seamless data integration and functionality.I also managed another application called Skooleeo,

which is another learning management system (LMS), where I contributed to its development and maintenance.

Baze University (August 2024 - Sept 2024)
