### EDUCATION

Osun state university, Osogbo, Osun state

2018

Bachelor of civil engineering

Second class upper division

### EXPERIENCE

2017 - Present

Self taught

Responsible for development of various application components and UI resources

Designed the features for the database interface relevant for the mobile application from the existing system

Integrated Google play services and Google Maps API

Performed testing on Physical device and the android emulator

Published and updated the application on the Google play store as e-reminder

Used Android studio IDE to develop the screens for the application using MVVM design pattern

Fixed bugs with code, design patterns and miscellaneous occurrences during projects

### PROJECTS

#### Breaking news Nigeria

The application allows users to read latest Nigeria news as they are released from various sources with a nice user interface. The app fetches data from remote api using retrofit and displays in a nice paginated recyclerview and further information about the news can be gotten by the webview that is being fetched from a remote server.

Responsibilities in the app:

Built the whole app

### **Synex app**

Project name: synex

Project description: This app allows customers to make different kinds of request and orders and allows them to keep a mobile wallet to cater for online purchase and gives the list of available products.

Google link: <https://play.google.com/store/apps/details?id=com.cloudware.synex>

Responsibilities in the app: Developed the major part of the app and consumed the api using retrofit and using recyclerview to display list of products.

### **E-reminder app**

Project name:E-reminder

Project Description:This app gives users the ability to create reminders, delete and saves them as well using sqlite as the database.

Googleplay link:-

[https://play.google.com/store/apps/details?id=com.aderty.e\\_reminder](https://play.google.com/store/apps/details?id=com.aderty.e_reminder)

Responsibilities in project: Took the main role of development and create project architecture and produced all graphics.

### **Weatherviewer app**

The app displays the weather condition of a selected place and shows the maximum and minimum weather conditions.

Using AsyncTask and an HttpURLConnection to invoke a REST web service or to download an image in a separate thread and deliver results to the GUI thread.

Responsibilities in project:

Built the whole app on android studio and tested it on emulator and real device

### **Flag quiz app**

This app allows user to select from a number of options to determine the flag that was displayed and randomly changes the options as the game progress

Responsibilities in project:

Built the whole app on android studio and tested it on emulator and real device
