Career Summary

Jan 2021 – Present

Gigs and Devs

Instructor and Software Developer

Outline:

Gigs and Devs is an organization based in Port Harcourt aimed at preparing and training people passionate and interested in working remotely for foreign companies. They also work for to provide these for jobs for the ones that successfully complete and satisfy all requirements to work there.

Key Responsibilities

- Teaching the students Web Development and some other supporting programming languages.
- Heading and handling complex projects, ensuring customers are always satisfied with the product.

Nov 2020 – Jan 2021

Self Employed

Outline:

After my service year I have worked with a series of companies and startups most notably Netopps and Gpot, building interactive and dynamic frontend designs as well as solid backend with the use of Laravel framework.

Key Responsibilities

- Building the Gpot official website.
- Inspecting the Rivers state ministry of information for networking purposes.
- Deployment of the Rivers ministry of information news portal.

Nov 2019 – Nov 2020

**INEC Headquarters Uyo
NYSC Corp Member**

Outline:

During my youth service year, I was posted to the I.C.T department of INEC headquarters in Uyo. I was part of a team which ensured that all electronic devices were maintained properly while also ensuring that electronic card readers used for elections were stored properly.

Key Responsibilities

- Maintained and updated electronic card readers used during elections.
- Maintenance and management of all electronic devices used in offices.
- Purchase of computer systems or its parts needed in any office.
- Trained non-IT staff members on how to use the electronic card readers during elections.
- Was in charge of a polling unit during a re-run senatorial election.

Aug 2019 – Nov 2019

**KodeCamp Services
System Analyst and Administrator**

Outline:

KodeCamp is an organization that offers a variety of services such as assisting people in gaining and processing admission, carrying out plagiarism test and reducing its percentage, carrying out trainings on web design, SPSS, etc. and so much more. I was brought in on a short term to troubleshoot and fix the systems.

Key Responsibilities

- Troubleshooting and fixing of computer systems used to train the enrolled students.
- Cloning of systems.

- Purchase of computer system parts to replace faulty ones.
- Installation of operating systems.
- Working on projects to reduce the plagiarism percentage.

Jan 2018 – Aug 2018

**RSU Central Library (I.C.T Department)
System Analyst and Administrator**

Outline:

I worked at the Rivers State University Central Library (I.C.T Department) during my six (6) months industrial training. The electronic library is host to over a 150 workstations which students could use to access the university's e-books and work on their computer skills.

Key Responsibilities

- Management and maintenance of workstations and the library's network.
- Troubleshooting and fixing of faulty systems belonging to staff members working in the central library and also in the electronic library.
- Provided assistance to students in need.
- Resolved issues and escalated problems with knowledgeable support and quality service.
- Building and management of websites for external contractors.
