Experience Summary.

I am a Software developer focused on JavaScript, Node.js, React, and Flutter for Mobile Development. I have more than 4 years of commercial experience creating and executing innovative software solutions to enhance business productivity. Professional, and product-oriented developer experience working in a variety of fast-paced, dynamic, and ever changing-setting. Experience includes working with and leading teams in building and designing beautiful User Interfaces, integrating SQL/client-server applications, developing high-quality in house tools to ease the development, management, and scaling of software products. Experienced with the Software Development Life Cycle (SDLC) process, which includes designing and implementing the software, debugging, fixing, and maintaining software.

Soft Skills.

Positive and well-organized, with excellent written and verbal communication abilities. Strong interpersonal skills as well as the ability to operate with little or no supervision. Multitasking prodigy with the capacity to understand corporate goals in order to make decisions while managing Software solutions. Proven ability to take initiative, evaluate specific problems, identify issues, and propose solutions or refer to the relevant resource.

- **languages:** HTML, CSS, JavaScript, Node.js, Dart.

- **Concepts:** Design Implementation, Clean Architecture, and Test-Driven Development.
- **Frameworks:** React.js, Flutter.
- **Database:** Firebase, SQL Server, MySQL.

Professional Experience.

AFRIITECH / African Institute of Information Technology. Explore your technology Investments.
Lead Software Developer – Inspired Bank of Africa, (October 2020).

- **Leading the software department and cooperating with the design and product teams for Inspired Bank Of Africa.**

AFRIITECH / African Institute of Information Technology. Explore your technology Investments.
Software Developer, 1 year 9 months (January 10th 2021-November 10th 2022).

- **Speaker and Project coordinator at Tech Insider Africa Conference / Bootcamp.**

I was a speaker and Project coordinator at Tech Insiders Africa, Tech Insiders Africa is a Tech conference hosted in Africa once a year, for both old and young techies to showcase their Tech talents, skills and learn more about tech and its growth in Africa. I am happy I was a speaker in this amazing conference.

- **Trained over 20+ young developers across Africa both online and on site, on the core/ basic concepts of software development.**

Trained and mentored upcoming developers on the basic concepts of software development, for some students they had to partake in the training online and others a one on one. I had several sessions with other Dev's to give helping hands in the areas needed, and it was a great work interacting with wonderful people.

- **I partnered with the InovaTeam coders in Designing and developing a Bus Ticketing App with over 800+ users across the country.**

I worked in hand with the InovaTeam coders and we designed and developed TrivagoCM. TrivagoCM is a Bus Ticketing Mobile / Web Application that grants easy Bus booking access to its users, its Aim is to reduce the manual procedure of Bus Booking. TrivagoCM Includes features like, a live Google map for location services, a bus tracking number that enabled users to track their bus, a timing notification that informed users about their bus departure timing, and more.

- **Worked in hand with the AFRISOFT developers and Developed a Clubfoot Software project for persons in Africa with disability having their own space for encouragements.**

I worked together with Afrisoft developers and realized this project. Clubfoot is a Platform for people with Disabilities. Clubfoot bring Disabled African persons together both young and old. It is a place where they get encouraged, share love, advices and more about themselves.

- Hardware department Maintenance assistant at Further Solutions Group intl. Developed and maintained hardware solutions increasing project efficiency at over 60% of productivity and functionalities.

Throughout my Development journey, Further Solutions Group provided me an amazing development life changing experience. I was chanced to be a maintenance assistant in managing and developing hardware solutions, that was my very first hardware experience. It was a great journey as we realized projects like, Finger print sensors, Motion detections in rooms, Drones and lots more.

- Served as technical lead for the Software Dev. Department of Techfest Africa, and i was in charge of prototyping, UI, and API Integration of Techfest Africa.

Techfest Africa. This Is an African Technology Festival where Teams, Techies, and Tech Companies come together to showcase their Skills, Tech Innovations, get Funding for Startups and Celebrate Technologies growth in Africa and the World. This Conference / Festival promoted so many Startup Companies and young developers, as they showcased their skills in solving life challenging problems with Tech. I am glad to say that I wasn't just a software guy at the Festival but also i was a Technical Lead for the Software Development Department of Techfest Africa (Host Company). And was in charge of their designs and more.

CivilSalt / IT consultation company.

Software Developer – Iris Track, (November 19th 2022 – January 25th 2023).

- Partnered with the creative and product team to maintain design and experience throughout product development.

At **CivilSalt** I had hands on deck has I partnered and worked together with creative product teams in accomplishing product design and developments of both soft and hardware products such as the IrisTrack.
