# Dennis Temoye

I am an accomplished Software Developer with extensive expertise in a variety of technologies, including React.js, MongoDB, MySQL, Node.js, Next.js, Chakra UI, Tailwind and PHP. With a strong foundation in software architecture and development, I bring a wealth of experience to every project I undertake. My proficiency extends beyond coding; I am also a skilled Technical Writer, adept at distilling complex technical concepts into clear, engaging content.

## Location

Ondo State, Nigeria

## Experience

### 2021-2022

Full Stack Developer | Toltem International Limited | Akure, Nigeria

- Collaborate with cross-functional teams, including designers, product managers backend developers, to translate requirements into scalable and intuitive user interfaces.
- Design and implement reusable components and libraries, ensuring consistency and maintainability across our applications.
- Develop an Inventory management System using react, NodeJS and MongoDB.
- Built a child abuse management system using React and PHP and MySQL.

### 2022-2023

FullStack Developer intern | Omnix BMS | Lagos, Nigeria

- Develop user-facing features using cutting-edge frontend technologies such as HTML5, CSS3, JavaScript (ES6+), SASS, PHP and a framework React.js.
- Collaborate with design teams to translate UI/UX design wireframes into high-quality, pixel-perfect user interfaces, ensuring consistency and alignment with brand guidelines.
- Implement accessibility best practices (WCAG standards) to ensure that web applications are usable and accessible to users with disabilities, including screen readers and keyboard navigation.
- Document frontend code, libraries, and APIs, and maintain up-to-date technical documentation to facilitate knowledge sharing and ensure smooth handover to other team members.

## Education

Olusegun Agagu University of Science and Technology | Ondo State, Nigeria

**2018 - 2024** | Bachelor of Technology in Computer Science

## Key skills and characteristics

- Proficiency in PHP: Strong command of PHP programming language, including its syntax, features, and best practices.
- Full Stack Development: Ability to work on both frontend and backend aspects of web applications, using PHP for server-side development and integrating it with frontend technologies.
- MVC Architecture: Understanding of Model-View-Controller (MVC) architecture and its application in PHP frameworks for organizing code and separating concerns.
