Education

Osun State University,
Osogbo.

B.Eng. Civil Engineering
2015

Key Skills

PHP
Laravel
JavaScript
VueJS
NodeJS
MongoDB
Firebase
MySQL
WordPress
GitHub
AWS
Docker
Jira
Debugging
Inertia

Objective

To work in an organization where I would be able to employ with integrity my technical knowledge as well as other trainings and experiences that I have acquired to solve problems and to be used for the furtherance of the objectives of the establishment, while readily adapting to the peculiarities of an organization and acting in conformity with its corporate values.

Experience

FEBRUARY 2023 - PRESENT

Backend Developer | Tedbree

- Laravel/PHP Backend Development - API Development
- NodeJS/JavaScript Backend Development - API Development
- Integration of third-party services and SDKs such as payment gateways, geolocation services, social authentication services etc.
- MySQL Database Design and Management - Application Debugging
- Application Testing
- Application Optimization
- Laravel/Inertia Monolith Full stack Web Application Development
- GitHub and Bitbucket Collaboration
- Project mapping with Miro Software
- Project issue tracking and sprint management with Jira Software
- Deployed new versions of software on production servers by utilizing Git, Jenkins, and Docker.
- Integrated third-party APIs into existing applications via JSON and XML protocols.
- Debugged issues in existing codebase and identified potential security vulnerabilities.

- Researched emerging technologies related to backend development best practices.
- Optimized database queries for improved performance through indexing techniques and query refactoring.
- Implemented automated unit testing practices for backend applications.
- Created detailed documentation for all developed APIs and databases structures.
- Maintained version control systems such as Git and SVN to track changes in source code over time.
- Wrote well-designed, testable code.

JULY 2021 – JANUARY 2023

Full stack Developer | Tedbree

- Laravel/PHP Backend Development - API Development
- NodeJS/JavaScript Backend Development - API Development
- Integration of third-party services and SDKs such as payment gateways, geolocation services, social authentication services etc.
- Database Design and Management
- Application Testing
- Application Optimization
- Vue Frontend Development
- Figma design implementation
- API Integration
- Laravel/Inertia Monolith Full stack Web Application Development - GitHub and Bitbucket Collaboration - Project mapping with Miro Software - Project issue tracking and sprint management with Jira Software
- Utilized Agile methodology for project management activities such as sprint planning meetings.
- Created reusable components that can be shared across different projects reducing development time.
- Collaborated with designers to create intuitive user interfaces for both mobile and desktop platforms.

- Provided technical support during post-deployment stages including bug fixing and maintenance tasks.
- Managed source control repositories with Git including branching strategies and pull requests.
- Conducted unit testing and integration testing for functionality.
- Wrote well-designed, testable code.

APRIL 2021 – JULY 2021

Web Developer Intern | Tedbree

- Bree CMS Development
- WordPress Development
- Laravel Backend Development
- NodeJS Backend Development
- API Development
- Application Development
- Database Design and Management
- VueJs Frontend Development
- Single Page Applications Development
- Server Side Rendered Application Development
- Laravel/Inertia Monolith Applications
- Performed unit testing of web application components to ensure quality assurance standards were met.
- Provided technical support for web development team members when needed.
- Tested code for accuracy and performance on multiple browsers and platforms.
- Updated existing webpages with new content in a timely manner.
- Followed coding standards while writing clean, well-structured code.
- Wrote efficient SQL queries to facilitate data retrieval from databases.
- Utilized version control systems such as Git to track changes in source code.

- Absorbed techniques from experienced developers to apply towards daily technical tasks.

DECEMBER 2017 – MARCH 2021

Web Developer | Veci Technologies

- WordPress Development
- Developed and implemented webpages using HTML, CSS, and JavaScript.
- Created dynamic websites by integrating back-end programming languages such as PHP, MySQL, and AJAX.
- Designed and Developed databases that supported Web applications and Web sites.
- Built custom plugins for WordPress sites to extend core features as needed.
- Created custom WordPress themes from scratch utilizing PHP and MySQL technologies.
- Debugged websites to identify and resolve potential problems.
- Configured servers for hosting websites using Apache, Nginx, or other web servers.
- Renewed domain name registrations

Certifications

Certificate in IT, **British Computer Society (BCS) 2022**

Languages

English (Fluent)
