As an experienced Full-stack Developer with over 3 years of hands-on coding experience, my objective is to continue building scalable web applications using my expertise in React, AngularJS, Angular CLI, Laravel, and CSS frameworks. I am passionate about delivering high-quality code that meets the needs of clients and end-users, and I thrive in challenging and dynamic environments that encourage collaboration, creativity, and continuous learning. My goal is to work with a team of like-minded professionals to create innovative solutions that drive business growth and provide value to users.

## **EXPERIENCE**

**Netplusdotcom, Remote**

**Full Stack Developer**

**November 2022 - present**

- Wrote a microservice using crow framework ( a css framework) that is used to generate a RRN for our customers overcoming duplicate errors
- Developed a Multi restaurant Web application that was developed using Angularjs and laravel api styled using bootstrap and using github for its ci/cd (Work in progress)
- Worked and revamped an existing customer dashboard that provides transaction details using Angular cli
- Participate in creating a database cluster to ease the load on our database server

- Utilized HTML, CSS, and JavaScript to create responsive landing pages for both company and client.

**Aher Technologies Limited, Lagos, Nigeria**

***Junior Full Stack Developer***

**January 2020 - October 2022**

- Worked on an angular powered web application using laravel as its api to develop an application called primalfit that bore resemblance to sage evolution software. Styled using bulma and material ui
- Worked on a quiz web app for a high school using vanilla javascript, php and html and styled using bulma css.
- Worked with Quality Assurance to get new pages/products tested, and addressed any issues within 48 hours.
- Participate in creating a database cluster to ease the load on our database server
- Utilized HTML, CSS, and JavaScript to create responsive landing pages for both company and client.
