## Work experience

### Full Stack Laravel Developer

July 2023 – December 2023

A Bill Splitting App. [splitbillpay.com](https://splitbillpay.com)

- Developed a bill splitting application using Laravel framework.
- Implemented a receipt reading software capable of extracting text from uploaded receipts.
- Designed functionality to interpret receipt data, list items, and calculate totals for bill splitting.
- Integrated PayPal payment gateway to facilitate user-to-user payments within the app.
- Optimized website loading speed, resulting in a 40% improvement in performance.
- Provided ongoing security maintenance and patching to ensure the website's viability post-launch.

Built with: Laravel, Tailwind Css, MySql, Paypal, Veryfi OCR

### Laravel FullStack Developer

December 2022 – February 2023

A Real Estate App [davidjohnstonrealestate.com](https://davidjohnstonrealestate.com)

- Built a feature-rich real estate listing platform with Laravel, integrating Stellar MLS RESO API.
- Implemented Google Maps API for providing directions to listed properties.
- Designed a user-friendly interface with Tailwind CSS for enhanced aesthetics and responsiveness.
- Ensured data accuracy and integrity through rigorous debugging and validation processes.
- Enabled secure authentication and user management functionalities for enhanced security.
- Engineered email notification system for house agents to receive alerts on property inquiries.

Built with: Laravel, Stellar MLS, Guzzle HTTPS SDK, Tailwind CSS
