Professional Experience

Lead Web Developer

CIFA Cyprus and UK, Kyrenia, Cyprus

July 2022 - August 2023

- Spearheaded the migration of backend systems to AWS to enhance scalability and fault tolerance.
- Enhanced platform performance by implementing effective caching strategies using Redis and fine-tuning Laravel settings.
- Developed and maintained robust RESTful APIs; integrated third-party services including payment gateways and social media to improve platform functionality and user

engagement.

- Managed database optimization and migration to cloud instances, significantly improving data retrieval speeds and system reliability.
- Enforced strict cybersecurity measures, utilizing AWS security tools to safeguard sensitive data and ensure compliance with privacy laws.
- Conducted unit and integration testing to ensure robust and error-free code.
- Managed server setup and management on AWS, ensuring high availability and reliability of applications.

Web Developer (Contract)

Advertpark, Kyrenia, Cyprus

April 2022 - July 2022

- Developed custom web applications tailored to client needs, focusing on functionality, performance, and security.
- Integrated APIs into financial websites to enhance functionality and user interaction, including payment processing and real-time financial data.
- Conducted training sessions on .NET framework, empowering team members to develop robust and scalable applications.
- Implemented automated testing procedures to streamline quality assurance and deployment processes.
- Managed server setup and domain integrations to ensure seamless deployment and operation of applications.

Web Developer PHP | CodeIgniter

Century21, Kyrenia, Cyprus

January 2022 - March 2023

- Designed, developed, and maintained WordPress websites with a focus on mobile responsiveness and user-friendly interfaces.
- Implemented SEO strategies to significantly enhance site ranking and visibility on major search engines.
- Integrated APIs to enhance website functionality, enabling advanced marketing, tracking capabilities, and real-time data feeds.
- Continuously developed and optimized a custom CRM built with CodeIgniter, hosted on Digital Ocean, improving business workflow efficiencies.
- Utilized Figma to CSS conversion techniques to ensure pixel-perfect front-end designs.
- Setup and managed servers on DigitalOcean, ensuring high availability and security.

Full Stack Web Developer

Intendox Investments, Kyrenia, Cyprus

October 2021 - January 2024

- Managed the company's WordPress website on DigitalOcean, implementing custom

themes and plugins tailored to real estate market demands.

- Applied advanced SEO strategies and utilized Google Analytics to track user interactions and optimize content, boosting traffic and user engagement.
- Introduced Node.js for server-side scripting to enhance website responsiveness and performance, significantly reducing load times.
- Completed full translation of the website to support multilingual content, broadening market reach and enhancing user accessibility.
- Successfully migrated all company data from AWS S3 buckets to a local company server, ensuring enhanced data sovereignty and security.

Full Stack Web Developer

PCMForex, Kyrenia, Cyprus

June 2023 - September 2023

- Developed a full CRM using Laravel and integrated DataTables for efficient data management and visualization.
- Deployed the CRM on Plesk, ensuring smooth operation and easy management of the application.
- Integrated Match-Trader and MetaTrader APIs to enhance the CRM's functionality, providing real-time trading data and seamless user experience.
- Conducted extensive testing to ensure the reliability and robustness of the CRM.
- Managed server setup and configurations on Plesk, ensuring high availability and security.
