Personal Projects

Initiated, designed and developed:

- OA-Recruitify: This is a comprehensive interview and assessment mobile application with features including streamlined dashboard management for organizations, pre-interview question scheduling with automated timers, assessment question tracking, direct video interview capabilities, and dedicated support team assistance for users.
- OA-Tendance: This is a web application which allows individuals record attendance only when they are within the set vicinity of their organization, they also get to fill once per day and the organization get to see all records in a structured manner at the backend.
- OA-Automate: An ERPs which as 6 dashboards for different individuals within the organization. With this project, I hoped to eliminate manual work process in organization thereby creating dashboards for jobseekers, staff, finance, managers, hr, and admin with their respective features.
- OA-Commerce: An ecommerce mobile application with all modern features to ease the buying and selling between merchants and their customers.
- OA-Notify: This help individuals with reminders via both email and text message once it time to perform a particular task or activity.
