Fullstack Developer

Hello i am Emmanuel a Passionate Fullstack Developer with over 5 years of experience building responsive and user-friendly websites and apps, Leveraging cutting-edge programming languages to craft innovative solutions tailored to customer needs and satisfaction anytime.

Project and Work Experience

At Cartelproduct.com

I Developed a secure payment gateway integration to facilitate smooth transactions.

Optimized database architecture for efficient product catalog management.

Implemented automated order processing and real-time tracking features.

Enhanced site performance through caching strategies and cloud deployment.

The Outcome & Impact:

It Increased platform efficiency, reducing load times by 11%.

and also Improved customer retention through personalized
Successfully launched and scaled the platform to accommodate growing user demand

Shore excursion and tour guide

I used Python, Django, jQuery, MySQL, JavaScript, Bootstrap, and AWS to create a dynamic and fully functional excursion agency.

And also used a network of agency APIs to automate excursion data collection and image storage within the system.

Automated 3 critical workflows payment reminders, tour cards, inventory sync saving 15+ weekly work hours and scheduled payment link notifications for upcoming excursions.

Reduced API response times by 40% through query optimization.

My Core Competent Areas

this is my core competence where i can confidently deliver when called on to carry out such assignments at anytime.

- . Payment Gateway Integration
- . Html/Css
- . Python/Django
- . AWS Cloud Architecture
- . Database Optimization
- . JavaScript/jQuery
- . CI/CD Pipelines
- . API Development
- . Tailwind/Bootstrap5
- . A proficient knowledge of Real-time Systems

Summary of Experince

- . proficient in development of front-end and back-end functionalities
- . profficient in database setup and writting algorithms
- . Good unnderstanding of the development plan
- . Proficient in Design, development and maintenance of the system code base.
- . proficient in setting up production environment and deploy proess.
- . Proficient understanding and development of API
- . Excellent cloning and Editing experience through powerful softwares like linux.

Career Philosophy

It's always about the solution and never the problem
and it takes just one line of code to make a difference
and change the situation let's make it happen.

Currently mastering

At the moment i have my hands on Node.js and also polishing my
React skills at the moment, learning never ends.

Working on bringing solving a major world problem which is private
for now.
