Professional Summary

Mid-level Software Engineer with 3+ years of hands-on experience in full-stack web development, specializing in the Laravel ecosystem. Proven track record in building and optimizing scalable web applications, designing RESTful APIs, migrating legacy systems, and improving deployment workflows using Git and modern development practices. Skilled in PHP, Laravel, JavaScript, CSS, and SQL, with practical experience in system automation, SEO-enhanced platforms, and cross-functional collaboration. Passionate about clean code, technical documentation, and delivering impactful software solutions. Keen interest in AI technologies, including machine learning and generative models, with an eye toward intelligent application integration.

Work Experience

Software Engineer at *Delon Nigeria Jobs*

June 2025 to July 2025

- Spearheaded the migration of Delon Health from a WordPress-based platform to a modern Laravel application, improving code maintainability and scalability.
- Integrated the Laravel application with a centralized Git repository to enable version control, streamline team collaboration, and support CI/CD best practices.
- Resolved critical email delivery issues across three company websites by diagnosing configuration flaws and implementing robust SMTP solutions.
- Monitored and audited hosting environments, proactively identifying technical issues and providing actionable recommendations to improve system reliability and performance.

Webmaster at *Risk Control Services Nigeria*

June 2022 to May 2025

- Designed, developed, and optimized RESTful API endpoints with PHP/Laravel.
- Played key role in the full software development lifecycle of all developed software during my time from requirements gathering to stage deployment
- Delivered timely technical support and training to internal teams, resolving 100% of reported issues within 24 hours and improving overall system adoption.
- Managed and enhanced company blog platforms, leveraging SEO best practices and content optimization to increase user engagement by 20%.

- Implemented structured Git workflows (feature branching, code reviews, and CI/CD pipelines), reducing deployment time by 30% and minimizing production incidents.

Website Administrator at *L& T Superstores*

June 2021 to April 2022

- Added and optimized 400+ products to WooCommerce prior to website launch.
- Collaborated with senior developer to improve product SEO, increasing online visibility.
- Maintained company's LinkedIn page to strengthen digital presence and engagement.

Business Development Manager at *Meridian 74 Group*

Nov 2020 to Feb 2021

- Researched and identified 100+ high-potential clients targeting Nigerian markets, supporting strategic expansion.
- Authored 6 in-depth market insights articles published on company website.

Graduate Technical Intern at *TechBridge Consulting*

May 2020 to August 2020

- Developed a WhatsApp outreach system designed to engage up to 1,000 users, enhancing communication for training campaigns.
- Executed targeted email campaigns to 2,000+ subscribers, achieving a 50% open rate and driving 50 paid course enrollments
