Experience

• Mogrex

4th March 2025 - 4th August 2025

Frontend Development

Catholic Parish Dashboard

- Developed a comprehensive dashboard to manage multiple Catholic parishes, parishioners, and their children with the team.
- Designed and implemented features to streamline parish management, enhance user experience, and improve data analysis.

Supportaka Dashboard

- Built a support dashboard for various products, providing a centralized platform for issue tracking, resolution, and customer engagement with the team.
- Ensured seamless integration with existing systems and optimized the dashboard for efficient support ticket management.

PayAspire and PinPay Integration

- Integrated PayAspire and PinPay payment gateways to enable seamless airtime and data purchases with the team.
- Ensured secure and reliable transactions, complying with industry standards and best practices.

Catholic Pay Dashboard

- Worked on the Catholic Pay dashboard, a companion platform for the existing Catholic Pay mobile app (available on Play Store and Apple Store) with the team.
- Focused on developing and enhancing the Customer Relationship Management (CRM) and parish administration features, as well as the super admin functionality.
- Ensured the dashboard provides actionable insights and efficient management capabilities for Catholic Pay administrators.

• WebCapz

-

App Developer Tutor

- Curriculum Development: Design and organize course materials, including lesson plans, coding exercises, projects, and assessments that cover the full spectrum of app development. This could range from introductory to advanced topics depending on the student's level.
- Instruction: Teach concepts related to app development, including programming languages (e.g., JavaScript), frameworks (e.g., React Native), and development environments (e.g., Xcode, Android Studio).
- Practical Guidance: Provide hands-on coding sessions where students can apply what they've learned in real-time. Assist with debugging, optimizing code, and implementing best practices.
- Assessment and Feedback: Evaluate students' progress through assessments, projects, and coding exercises. Provide constructive feedback to help them improve and understand their mistakes.

• Exposit media

February 2021 - October 2023

Junior Software developer

- **Software Development:** Write, test, and maintain code for software applications in languages such as JavaScript, Python, Java and PHP. Contribute to the development of both front-end and back-end components.
- **Collaboration:** Work closely with senior developers, product managers, and other stakeholders to understand project requirements and deliver high-quality software solutions.
- **Code Reviews:** Participate in code reviews, offering constructive feedback to peers and receiving guidance to improve your own coding practices.
- **Learning and Growth:** Continuously learn new technologies, tools, and best practices. Stay updated on industry trends and innovations.
- **Agile Methodologies:** Engage in Agile practices, including attending daily stand-ups, sprint planning, and retrospectives to ensure timely delivery of projects.

Education

- **Amawom Community School, Amawom, Abia State** 2010
First School Leaving Certificate (FSLC)
- **Victory High School, Elemenwo, River State.** 2016
West African Examination Council (WAEC)
- **Michael Okpara University of Agriculture** 2022
Computer Engineering

Skills

- Html5
- CSS3
- JavaScript
- Typescript
- React Js
- React Native
- Next js
- Axio
- Rest api
- Chakra UI and Materials UI
- Tailwind
- GraphQL

Achievements & Awards

- Certificate name is Certificate of Excellence, issued by UP-SOLUTION RESOURCES INT'L and the year I acquired it was 3rd July 2021
- Certificate of Completion in the DevCareer Tech Program(Fronted Engineering), issued by DEVCAREER and it was awarded on April, 2024
