### SUMMARY

---

Versatile and solutions-oriented Software Developer at Kavsis, collaborating with diverse clients to deliver high-quality software solutions. Experienced in enhancing existing codebases, building applications from the ground up, and managing infrastructure across various cloud service providers. Adept at feature implementation, system integration, and infrastructure automation to meet dynamic project needs and client goals.

### WORK EXPERIENCE

---

#### Software & Cloud Engineer | DevOps Specialist — Kavsis

Collaborated with clients to deliver tailored software solutions, including feature enhancements, new development, and cloud infrastructure management.

- **Full-Stack Development:** Modified and optimized existing codebases by adding, removing, and refining features to improve functionality and user experience.
- **End-to-End Software Development:** Designed and built new applications from scratch, ensuring scalability, performance, and alignment with client requirements.
- **Cloud Infrastructure Management:** Deployed, configured, and maintained cloud environments (e.g., AWS, Azure & GCP), including setup, teardown, and infrastructure automation.
- **Client-Centric Solutions:** Worked closely with stakeholders to translate business needs into technical implementations, ensuring timely delivery and high-quality results.
- **Manage junior & intern developers:** Provided learning paths into various branches of development. Assign relevant tasks and follow up on their progress.

### TECHNICAL SKILLS

---

**Programming Languages:** JavaScript, TypeScript, YAML, PHP, Python

**Frameworks & Libraries:** React.js, React Native, Alpine.js, Angular, Vue.js, Next.js, Bootstrap, Nuxt.js, Express.js, Flutter, Django, Laravel, Livewire, Tailwind CSS, NativeWind, Inertia, ASP.NET, Blazor

**Runtime Environment:** Node.js, Capacitor.js

**Databases:** MySQL, MongoDB, DynamoDB, IndexedDB, PostgreSQL

**Version Control:** Git

**Collaboration:** Figma, GitHub, GitLab

**CMS:** WordPress, Wix

**Project Management:** Asana, GitHub Projects, Jira

**Documentation:** Postman

**State Management:** Redux, Pinia, NgRx

**Data Visualization:** D3.js, Three.JS

**Algorithms & Data Structures:** Linear and Non-Linear Data Structures; Sorting, Graph, Dynamic Programming, and Backtracking Algorithms.

**Analytics:** Google Analytics, Mixpanel

**Cloud & BaaS Providers:** AWS, Azure, GCP

**CI/CD:** GitLab Pipelines, Jenkins, GitHub Actions

**Monitoring:** New Relic, OpenTelemetry, Prometheus, Nightwatch

**Tests:** Jest, Testing Library, Supertest, Playwright, Jasmine, Pest, Flutter Test Library, Pytest

**Others:** HTML, CSS, GraphQL, Nginx, ESLint, Ansible, Webpack, Babel, Axios, AJV, Mongoose, Docker, Microsoft 365, TDD, AGILE, SCRUM, Terraform, Redis, Kafka, Websocket, Webhooks, Laravel cloud, SonarQube.

## Certificate

---

- Graph Developer - Associate.  
Apollo Certified
- Unit Testing for Typescript &  
NodeJs Developers with Jest -  
Udemy

## SOFT SKILLS

---

**Innovative:** Proven track record of bringing innovative ideas to projects, contributing to creative and efficient solutions.

**Self Starter:** Take ownership of projects without the need for micro-management.

**Problem Solver:** Strong analytical and problem-solving skills, adept at identifying and resolving challenges to ensure the smooth development and deployment of software.

**Adaptability:** Quick learner with the ability to adapt to new technologies and industry trends, ensuring the development of cutting-edge and relevant software solutions.

**Team Player:** Collaborative team player, capable of working effectively in cross-functional teams to achieve project goals.

**Attention to Detail:** Meticulous and detail-oriented in coding and project execution, ensuring the delivery of high-quality software products.
