

VICTOR (JOHN) CHUKS

SOFTWARE DEVELOPER

Lagos, Nigeria | +2348020571833 |  john.victor62@yahoo.com |  [Victor \(John\) Chuks](#)

PROFILE SUMMARY

I am an ambitious, self-motivated software developer with a broad range of experience across various areas of tech. Over the course of my career, I have successfully navigated different roles, including working as a freelancer, being part of a full-time team, and even taking on leadership responsibilities as a tech lead. In this leadership capacity, I managed entire tech departments, overseeing development, design, and product teams. My responsibilities included initiating project scopes, managing sprint planning, and facilitating daily stand-ups to ensure smooth project delivery.

With a strong foundation in software architecture and design, I am proficient in a variety of technology stacks and frameworks. My primary expertise lies in PHP with a focus on Laravel framework while Symfony and CodeIgniter may be considered secondary; I also have experience in frontend technologies like React.js with Typescript, and backend frameworks such as Node.js and Spring Boot. In addition, I am familiar with databases including MySQL, MongoDB, and SQLite, and I have a working knowledge of Java (J2SE), C++, and WebRTC using Ratchet or Socket.io.

I am always eager to learn and adapt to new technologies, with a passion for creating efficient, scalable solutions that deliver real value to users and stakeholders alike

TECHNICAL SKILLS

PHP | Laravel | Symfony | CodeIgniter | Node.js(Express) | Spring Boot | MySQL | MongoDB | SQLite | HTML5 | Bootstrap CSS | Tailwind | jQuery | VanillaJS | React & Typescript | Java(J2SE) | C++ | Django

TOOLS AND SERVICES

Git | Github | Postman | Trello | JIRA | Netlify | Google meet | Microsoft365 | VS Code | IntelliJ | Android Studio | Eclipse | Composer | Node | Xampp | FileZilla | Apache | Tomcat | Maven | PIP | CPanel | GCC compiler | Windows `10 | Linux (Ubuntu)

EDUCATION

Coursera(Online):	AVR Microcontroller	Currently
Aptech Computer Education - STPL:	Relational Database Management System (RDBMS)	July 2011 – Aug 2011
Aptech Computer Education - STPL:	Microsoft Certified IT Professional (MCITP)	May 2011 – June 2011
Aptech Computer Education - STPL:	Microsoft Certified System Engineer (MCSE)	Mar 2011 – Apr 2011
Sun Microsystems:	Java2 Standard Edition (J2SE)	Oct 2008 – Feb 2009
Links Computer College:	Hardware Engineering & networking	Apr 2008 – Sep 200

WORK EXPERIENCE

Losode INC (Backend Developer).

Feb 12th, 2024 – Aug 21st, 2024

- Involving in the database architecture.
- Implementing database query optimizations.
- Implementing Backend logics and API design using Laravel.
- Maintaining design patterns and code architecture.
- Brainstorming with the team during sprint planning.

AZany INC (Tech Lead).

Oct 20th, 2021 – June 27th, 2023

- Tech leadership across-board
- Project management
- Sprint planning, sprint management and reviews
- Database architecture
- Backend REST API developments and documentations with Laravel and postman
- Code Reviews and testing.

Sanchy Kreations (Backend Engineer)

Feb 5th, 2022 – Apr 7th, 2022

- Involving in the database architecture
- Implementing database query optimizations.
- Implementing Backend logics and API design using Laravel
- Maintaining design patterns and code architecture
- Brainstorming with the team during sprint planning

Pignus Technologies (Full-stack Engineer)

Jan 15th, 2021 – Oct 8th, 2021

- Responsible for the database design.
- Implementing database query optimizations.
- Implementing business logics using Laravel.
- Maintaining design patterns and code architecture.
- Performing quality assurance.

Globemeth (Backend Engineer & Team Lead)

Aug 1st, 2020 – Oct 23rd, 2020

- Tech leadership across-board
- Project management
- Sprint planning, srpint management and reviews
- Database architecture
- Backend REST API developments and documentations with Laravel and postman
- Code Reviews and testing.

Losode INC (Backend Support)**Mar 13th, 2020 – Apr 30th, 2020**

- Involving in the database architecture.
- Brainstorming with the team during sprint planning.

Brinq Africa (Field Support Engineer)**Dec 1st, 2019 – May 31st, 2020**

- Providing technical supports to merchants in possession of Point Of Sales (POS) Terminal.
- Collaborating with the banking team to resolve any transaction issue.
- Tracing and tracking merchant's location whenever the need arises.
- Brainstorming with the team on how to increase sales.

Ingres Quality Rollout (Project Support Engineer)**Dec 1st, 2012 – Aug 15th, 2013**

- Responsible for managing school management portal.
- Collaborating with staffs to provide me with the old system database file and paper works.
- Responsible for rectifying accumulated errors such as: time table error, teacher subject allocation error, teacher class allocation error, student class allocation error, student IDs error etc.

Aptech Computer Education (System Administrator)**Fed 11th, 2011 – Sep 16th, 2011**

- Responsible for maintaining the office IT facilities such as PCs, Servers and Network infrastructures
- Handling system and network troubleshoot and the replacements of parts.
- Also functioned as an instructor in A+ and MCSE classes.
