OBJECTIVE

Seeking a backend development position where I can leverage 6+ years of PHP experience and 3+ years of JavaScript expertise to architect, build and maintain scalable web applications. Passionate about clean code, system architecture, and DevOps practices that contribute to high-performing applications.

TECHNICAL EXPERTISE

- **Backend Technologies:** PHP (Laravel, Symfony), JavaScript (Node.js, Express, AdonisJS, NestJS)
- **Frontend Technologies:** HTML/CSS, Tailwindcss, JavaScript, TypeScript, VueJs, ReactJs
- **Database Design:** MySQL, Postgress, efficient query optimization
- **API Development:** RESTful API design and implementation, API security
- **DevOps:** CI/CD pipelines, AWS cloud infrastructure, Docker containerization
- **Testing:** Unit testing, integration testing, TDD methodologies

PROFESSIONAL EXPERIENCE

[DIGIFIGS](#) LLC, Ibadan — Lead Backend Developer

2022 - PRESENT

- Lead backend team across multiple technologies (Laravel, Node.js)
- Architect and implement scalable backend solutions for company products
- Built PostPaddy (<https://postpaddy.com>) social marketing platform with Laravel backend and Node.js microservices
- Developed Giftly.me gift platform with separate vendor and customer services using Laravel and AdonisJS
- Implement and maintain CI/CD pipelines for reliable deployment
- Built a robust queuing system to auto-process scheduled posts from users' queues—boosting social posting throughput by **20%**

[LUXURYWITHLAN.COM](#), Remote — Senior Backend Developer

2024 - 2025

- Designed comprehensive property management system using NestJS

- Built robust API endpoints for property listing, booking, and payment processing
- Implemented geospatial search functionality and notification systems
- Engineered secure user authentication and optimized database queries for high traffic
- Developed admin dashboard with detailed analytics using Express and Vue.js

[QATALOOG](#), Lagos — Lead Backend Developer/CTO

2024 - 2025

- Architected Learning Management System using Laravel.
- Implemented audio/video proctoring services with python which build more trust into all of the clients
- I led the initiative to refactor the platform into a fully multi-tenant architecture. This shift resulted in a **70% increase in business-type customer acquisition**.
- Designed secure data segregation for educational institutions and publishers
- Created integration APIs for third-party educational tools

[REACHAFRIKA LTD](#), Lagos — Backend Developer

2023 - 2024

- Built core modules for payment processing platform
- I collaborated with the team to build a POS management system tailored for restaurants. The system improved the company's accessibility by **50%**. Real-time ordering and booking features enhanced customer satisfaction, with over **70%** of users reporting a smoother service experience.
- Applied performance optimization techniques to improve application response times

[CLOUDWARE TECHNOLOGIES](#), Ibadan — Full-stack Developer

2021 - 2022

- Developed Oyaca with Laravel for Oyo State Government which manages over 7 million residents of the state
- Built GonaPay international loan platform with Laravel components
- Created ticket booking platform for Oyo State Shooting Stars FC which improves the Revenue of the organization by 30% and 100% movement and management of tickets revenue
- Managed deployment activities and server administration

[ELECTRODE.dev](#) — Fullstack Engineer

SEPTEMBER 2020 - PRESENT

- Contributed to surfpay.net using Laravel and Node.js microservices
- Designed system architectures for payment processing applications
- Coordinated project deployments and managed CI/CD pipelines
